GOVERNMENT BOND FUND

For investors seeking high current income consistent with preservation of capital through a portfolio of U.S. government bonds

9.30.11 » Third Quarter Fact Sheet

Investment Objective

WesMark Government Bond Fund seeks to achieve high current income consistent with preservation of capital. The Fund invests primarily in a diversified portfolio of government securities, including securities issued by the U.S. Treasury and U.S. government-sponsored entities.

Why WesMark Funds?

Experienced portfolio managers

- The portfolio managers have a combined 64 years of investment experience;
- In addition to managing the WesMark Funds, the portfolio managers also manage trust-account portfolios and a bond portfolio for WesBanco Bank – more than \$3.7 billion in total assets.

Portfolio management strategy

- Fund may invest in mortgage securities and callable notes issued by Fannie Mae (Federal National Mortgage Association) and Freddie Mac (Federal Home Loan Mortgage Corporation);
- Mortgage securities may offer relatively high yield and a stream of cash flow from principal payments, which will provide opportunities to manage the Fund under changing market conditions;
- Callable notes typically have higher yield as a result of the call feature, which, combined with analysis of the direction of interest rates, management presently believes can provide opportunities for above-market returns;
- Fund may invest in securities of any maturity and does not target any specific duration; duration of portfolio securities results from management's analysis of economic conditions.

No-load structure

- All of your investment goes to work for you because no sales charge ("load") is deducted when you purchase WesMark Fund shares.

Growth of \$10,000 Invested in WesMark Government Bond Fund

September 30, 2001 through September 30, 2011

Performance data quoted represent past performance, which is no guarantee of future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost.

Mutual-fund performance changes over time, and current performance may be lower or higher than shown here. For current performance to the most recent month-end and for after-tax returns or for more complete information, call 1-800-864-1013 to speak with a WesMark Funds representative.

Lipper figures represent the average of total returns reported by all of the mutual funds designated by Lipper, Inc., as falling into the Intermediate Government Funds category.

Performance as of September 30, 2011

Average Annual Total Returns	
1 Year	3.89%
3 Years	4.97%
5 Years	4.97%
10 Years	3.94%
Since Inception*	4.53%
Expense Ratio (%)	
1.02%	

The Expense Ratio represents the operating costs borne by the fund, expressed as a percentage of the fund's average net assets, as shown in the Fee Table in the fund's prospectus (under "Total Annual Fund Operating Expenses").

* Fund Inception: 4/20/98

*The Fund is a managed portfolio and its holdings are subject to change.

Mutual funds are not bank deposits, are not guaranteed by WesBanco or its affiliates, and are not insured or guaranteed by the FDIC, the Federal Reserve Board, or any other government agency. Investment in mutual funds involves risk, including possible loss of the principal amount invested.

Performance shown is before tax.

The 30-day yield is calculated by dividing the net investment income per share for the 30 days ended on the date of calculation by the maximum offering price per share on that date. The figure is compounded and annualized. The 30-day distribution yield contains an average of the past 30 days' daily distribution yield annualized.

The 30-day SEC yield is a calculation based on a specified 30-day period by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period and annualizing the results on a semi-annual basis.

Total return represents the change in the value of an investment after reinvesting all income and capital gains.

See the prospectus for other fees and expenses that apply to a continued investment in the Fund.

Bond prices are sensitive to changes in interest rates and a rise in interest rates can cause a decline in their prices.

The value of some mortgage-backed securities may be particularly sensitive to changes in prevailing interest rates, and although the securities are generally supported by some form of government or private insurance, there is no assurance that private guarantors or insurers will meet their obligations.

Duration is a measure of a security's price sensitivity to changes in interest rates. Securities with longer durations are more sensitive to changes in interest rates than securities of shorter durations.

WesBanco Investment Department, a division of WesBanco Bank, Inc., is the Investment Adviser to WesMark Funds. ALPS Distributors, Inc., which is not affiliated with WesBanco, is the Funds' distributor.
